## About the Host City

### "Economic Powerhouse Daejeon"

Daejeon is Northeast Asia's leading R&D and higher education hub, and Korea's high-tech future. It is home to Daedeok Innopolis. Established in 1973 as the first government-funded research park, Daedeok Innopolis is a unique technology cluster where more than 26 government-funded research institutes with over 30,000 researchers and several higher learning institutions, including the Korea Advanced Institute of Science and Technology(KAIST) and Electronics and Telecommunications Research Institute(ETRI). Thanks to this unique technology infrastructure of the city, Daejeon has become known as the Silicon Valley of Asia.

Owing to its superb technological capability, Daejeon has been selected as the core city of the National Science Business Belt, which is the Korean government's worldwide initiative to support the development of the basic and applied science and technology of the nation.
