| Exhibitor Introduction | <p>Eastern Superconducting Technology (Suzhou) Co., Ltd. has focused on the R&D and production of 2G-HTS tapes since 2011. With proprietary IBAD+MOCVD technology and in-house developed equipment, our REBCO tapes perform excellently in low-temperature, high-magnetic-field conditions. The HF1200 series enables mass production of tapes over 1,000 meters in length, with a critical current (I_c) of over 1200 A/1.2 mm at 20 K, 20 T (B//c). Our annual capacity for 4mm-width 2G-HTS tapes will reach 20,000 km by 2026, with stable quality and outstanding performance. Our products are widely used in fusion, superconducting cables, maglev and other key fields.</p> | |
| Exhibit Description | | |
| Exhibit Product | 2nd-generation high temperature superconducting (2G-HTS) tapes | |
