

ICEC30/ICMC 2026

June 22-26, 2026

Daejeon Convention Center (DCC), Daejeon, Korea

Company Name	Celeroton AG	Company Logo
Address	Industriestrasse 22, Switzerland	
President	Martin Bartholet	
Website	www.celeroton.com/home/en	
E-mail	info@celeroton.com	
Telephone	+41 44 250 52 20	
Fax	-	
Exhibitor Introduction	<p>The Swiss high-tech company Celeroton is a pioneering innovator in ultra-high-speed, oil-free turbomachinery with gas bearings for cryogenic and industrial applications. Our compact turbo compressors and expanders form the backbone of efficient, stable cooling across a wide range of applications, from Reverse Turbo-Brayton (RTB) cryocoolers for quantum computer cooling and hydrogen liquefaction to zero-boil-off (ZBO) systems and air-cycle machines. Visit us at ICEC30/ICMC 2026 to discover how our precision engineering and advanced bearing technology are shaping the future of sustainable, low-maintenance cryogenic processes, delivering unmatched efficiency at every scale.</p>	
Exhibit Description	<ul style="list-style-type: none"> - Oil-free turbo compressors: Gas bearing operation for zero-contamination gas streams. - High-speed expanders: Engineered for maximum thermodynamic efficiency in low-power cooling cycles. - Maintenance-free operation: Contactless rotation eliminates service intervals and prevents unplanned downtime. - Target applications: Zero-boil-off, small-scale hydrogen liquefaction, Reverse Turbo-Brayton cryocoolers, and aerospace cooling systems 	
Exhibit Product	<p>Turbo compressor CT-1052-He Frequency converter CC-230-3500</p>
