

ICEC30/ICMC 2026

June 22-26, 2026

Daejeon Convention Center (DCC), Daejeon, Korea

Company Name	WESTERN SUPERCONDUCTING TECHNOLOGIES CO., LTD	Company Logo
Address	12 MINGGUANG ROAD 710018, XIAN, SHAANXI, CHINA.	
President	Feng Yong	
Website	https://www.c-wst.com	
E-mail	louyinghui@c-wst.com	
Telephone	0086-29-8961-6812	
Fax	0086-29-8961-6821	
Exhibitor Introduction	<p>Western Superconducting Technology Co., Ltd. (WST), which was established in Xi'an, China in 2003, is an advanced research and production base of superconducting wire. WST has the low temperature superconducting alloy bar, wire and magnet production complete flow process with a various of production such as Nb₃Sn and NbTi superconducting wires, as well as MgB₂ superconducting wires and special magnets which are widely used in high-tech fields like large science device for fusion and accelerator, magnetic resonance imaging machine (MRI), nuclear magnetic resonance spectrometer (NMR), advanced semiconductor manufacturing, wind power systems, quantum computers, magnetic separation systems etc. WST has an annual production capacity of over 3,500 tons of superconducting wires at present.</p>	
Exhibit Description	<p>superconducting wires for cryogenic engineering, medical MRI, scientific research, power transmission and other high-end fields.</p>	
Exhibit Product	<p>superconducting wire,</p>
