Exhibitor Introduction	<p>Bluefors builds the world's most accessible, innovative and reliable cooling solutions for low temperature physics applications. Our systems are relied upon by thousands of scientists to cool the world's brightest ideas into reality. We are dedicated to delivering the most advanced and powerful cryogenic products through our Bluefors and Cryomech brands. The quality of our products in combination with our industrial design excellence and scalable production capabilities makes Bluefors the preferred choice for the ultra-low temperature needs of universities, research institutes, and corporations globally.</p>	
Exhibit Description	<p>Bluefors produces the world's best cryocoolers through the trusted Cryomech brand, building on Cryomech's position as the global leader in cryocooler technology for over 60 years. Whether you are condensing and liquefying cryogens or conductively cooling your sample, with the largest variety of cryocoolers on the market, we have the perfect solution for every application.</p>	
Exhibit Product	PT205, PT425
